## Book Publications:

**The Young Bultmann: Context for His Understanding of God, 1884–1925.** American University Studies Series 7, Theology and Religion. New York: Peter Lang, 2008.

**Comments from inside the book jacket:**

“In this groundbreaking study William Dennison moves beyond interpreting the history of theology simply as a phenomenon in the history of ideas and instead sees theology as developing within the broader historical and cultural movements of its time. He draws on a wide range of primary and secondary sources to locate Rudolf Bultmann’s theology in its social, historical, philosophical, and theological context. **In what is the most impressive English-language study of Bultmann’s early theology**, Dennison persuasively argues that Bultmann remained deeply influenced by the tradition of the mediating theology of Schleiermacher which sought to connect the findings of scholarship with pastoral and parochial theology. The influences of the History of Religion School, the early dialectical theologians, including Karl Barth, as well as the philosophy of the Marburg neo-Kantians and later of Heidegger, are discussed in detail alongside Bultmann’s background in a rural parsonage which decisively shaped his approach to theology and religious experience. This clearly-written and accessible book makes an important contribution to the study of the development of German theology in the early twentieth century.” Dr. Mark D. Chapman, Vice-Principal of Ripon College Cuddesdon, Oxford and a member of the Faculty of Theology, Oxford University. He is also editor of the *Journal for the History of Modern Theology/ Zeitschrift für Neuere Theologiegeschichte*.

**A Christian Approach to Interdisciplinary Studies: In Search of a Method and Starting Point.** Eugene, OR: Wipf and Stock, 2007.

**Comments from the book jacket:**

“Let’s face it. As colleges and universities overhaul their general education, core, and honors programs, let alone their majors, many are replacing the separate disciplines with an interdisciplinary approach, whether faculty like it or not. William Dennison’s *A Christian Approach to Interdisciplinary Studies* arrives just in time to give us the ‘ontological integrative starting point’ and justification for a Christian approach to IDS. A joy to read, this scholarly work defends and articulates the interdisciplinary approach provided by the Triune God of the Scripture, the ‘author of integration.’” Mary Dengler, Associate Professor of English, Editor of *Pro Rege*, Director of the Kuyper Center, Dordt College

“In a careful critique that calls for a response from his fellow interdisciplinary theorists, Dennison asserts that interdisciplinary studies have failed to achieve its purported defining characteristic: integration. In his bold proposal for a Christocentric foundation for interdisciplinary studies, Christian academics of all disciplines will find a challenging, even rebuking, call to conformity to Christ in our profession. Perhaps most important, Dennison establishes a vital role for interdisciplinary studies in Christian colleges and universities—not in weak imitations of anemic secular models, but in uniquely Christian programs built on the truth that integration is already achieved in Christ, who is before all things and in whom all things hold together.” Christopher Horne, Assistant Professor of Public Administration, University of Tennessee @ Chattanooga
